

# Looking for a fresh approach to tackling production problems?

How would you like to increase revenues, reduce operating costs and reduce emissions all at once?

Performance Improvements (PI) Limited specialises in getting the most out of processing equipment, for less. We help our clients increase their plant capacity, uptime and machinery performance. At the same time, we identify and deliver reductions in both operating costs and emissions. We will even provide training to ensure that the experience and knowledge gained is retained within your team.

We achieve all this by working closely with our clients and providing access to an outstanding multi-disciplined team of highly motivated and experienced engineering specialists.

We don't promise miracles, but we do promise to make a difference.

**Our services include the following:**

π Conceptual Design π Process Simulation π Debottlenecking & Troubleshooting π Compression Optimisation  
π Field Optimisation π Downtime Minimisation π Control & Operability Improvements π Metering & Allocation  
π SCADA/DCS Support π Artificial Intelligence
